

# A26

▶ A NEW BREED WITH  
UPTIME IN ITS DNA.

## MEET THE INTERNATIONAL® A26 ENGINE UP-CLOSE AND PERSONAL.

On Tuesday, April 24th, Lakeside International Trucks will be hosting the International® A26 Engine Mobile Training Tour with International product experts. It's your chance to experience the simplicity and quietness of this totally re-engineered engine, born with uptime in its DNA.

Come see what makes this new engine so special while enjoying delicious food and beverages at our lunch reception.

Watch for us on the road, too! We put two 2018 International® LT™ Series trucks, equipped with the International A26 engine, on the road to pull our trailers - and they're headed our way.

We look forward to seeing you at the International® A26 Engine Mobile Training Tour!
